## **PROFESSIONAL QUALIFICATIONS**

Experienced software development professional with a proven track record in creating features, resolving bugs, and driving overall product excellence. Proficient in user interface development, specializing in React and React Native with TypeScript, as well as backend development utilizing Node.js and Java. Possesses expertise in leading stacks and frameworks including React, Angular, Next.js, TypeScript, Tailwind, Bootstrap, SpringBoot and others.

Demonstrated proficiency across multiple operating systems including Windows, Linux, and MacOS, with intermediate-level knowledge. Primarily adept in JavaScript, with additional competencies in Python and Java. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

## **ACADEMIC EDUCATION**

- **Graduated in Computer Science – UNIP (2018-2021)**

## **CERTIFICATES AND SKILLS**

- Course Web Full JavaScript 2021 - Udemý (08/2021 - 05/2022)
- Course Rocketseat GoStack (01/2020 - 11/2020)
- Course Python Language - Udemý - (03/2019 - 04/2019)

## **LANGUAGES:**

- **English** - Advanced
- **Spanish** - Basic

## **PROFESSIONAL HISTORY**

**UpWork - (ago/23 – current) – Freelancer platform.**

**Software Engineer/Mid Level Full-Stack Developer**

Working directly as a FullStack Software Developer with React and Java languages as a Mid Level Developer, using frameworks like Typescript, Bootstrap and SpringBoot, developing features and addressing bugs in fintech project resolutions, encompassing payment systems and ERP functionalities.

**Coopersystem - (jan/22 – aug/23) – Large cooperative, active in the most diverse fields of technology developing solutions for companies.**

**Software Engineer/Mid Level Developer**

As an experienced developer, I have refined my skills in Swift linking for React Native bundle integration. With a wealth of experience in major projects, I have extensively utilized Swift, diving deep into its nuances to deliver robust solutions. In addition to Swift, I have successfully tackled challenges in Angular and React, leveraging TypeScript to develop efficient problem resolutions. Whether it's debugging complex issues or implementing new features, my expertise in these technologies ensures seamless development cycles.

I have also spearheaded the development of complete React Native applications, including an Internal Time Tracker, from initial concept to deployment. This hands-on experience has provided me with a thorough understanding of the framework, enabling me to create intuitive and engaging mobile experiences. Furthermore, complementing my front-end expertise, I am proficient in back-end development using Node.js. With a strong focus on database management, I have constructed scalable and responsive applications that seamlessly align with client requirements.

Additionally, I have experience utilizing cloud tools such as S3 and EC2 from Amazon Cloud, enhancing the scalability and efficiency of projects.

**Qyon Intelligent Systems - (april/21 – nov/21) – Large multinational Fintech, active in the field of software development with artificial intelligence.**

**Software Engineer/Mid Level Developer**

Worked as a Mid-Level Front-end Software Developer, leading a team in the development of a fintech application. Responsible for technical discovery, facilitating committee meetings on updates and new features, and crafting new pages and components using React Native with TypeScript.

**BUTH - (set/20 – april/21) - Medium-sized Fintech, active in the field of software development.**

**Junior Level Developer**

Responsible for developing screen features and bug resolution, primarily using React Native and React, and integrating other tools such as Bootstrap, Typescript, and StyledComponents, in collaboration with the team, to create an application for an insurance company. Development of API calls and implementation of new features on the backend using Node.js and TypeScript. In charge of the client's main means of monitoring end users, the backoffice, developed in React with Bootstrap.

**Matera Financial Risk Retail - (Jan/19 – Dez/19) - Large-scale company, its main focus is on assisting retail sector businesses in managing and mitigating financial risks associated with their operations.**

**Trainee**

Software development intern with Java Spring Boot, where I've been focused on creating efficient solutions and fixing bugs in complex and legacy systems. Working directly with widely used tools in the market such as Docker, Swagger, and OracleDB, I've been able to streamline the development process and ensure the quality of the company's ERP product solutions.
